

## **ABSTRACT**

1        A video data and web site data stored compact disk (CD) comprises: a first  
2        data zone for storing and providing video data to a VCD player for reproduction,  
3        and a second data zone for storing and providing video data of a plurality of web  
4        pages for a browser to execute hypertext link with the first data zone, so that the  
5        VCD player can perform playback of the video data stored in the first data zone  
6        when the CD is placed in the VCD player or the browser can access the web pages  
7        when the CD is placed in a computer.
